

Introducing the New Trillium 4500

The original Trillium 1300

The new, larger Trillium 4500
4.50 meters (15 ft.) of practical beauty

By popular request, and after seven years of success with our Trillium 1300, we have combined its versatility, comfort and convenience with several new features and come up with a package you cannot resist.

The main feature is it's larger. Yet the compact and lightweight design maintains its gas-saving quality.

Increasing the length has allowed us to give you more where it counts: a full size double bed, 30" wide bunks, a larger clothes closet, increased window size, and an appealing kitchen area with a few new features of its own.

We have extended the counter and topped it, and the stainless steel sink, with a beautiful butcher block cover that gives you a 30 in. working surface. We have also added drawer space, a kitchen caddy and a three-burner stove.

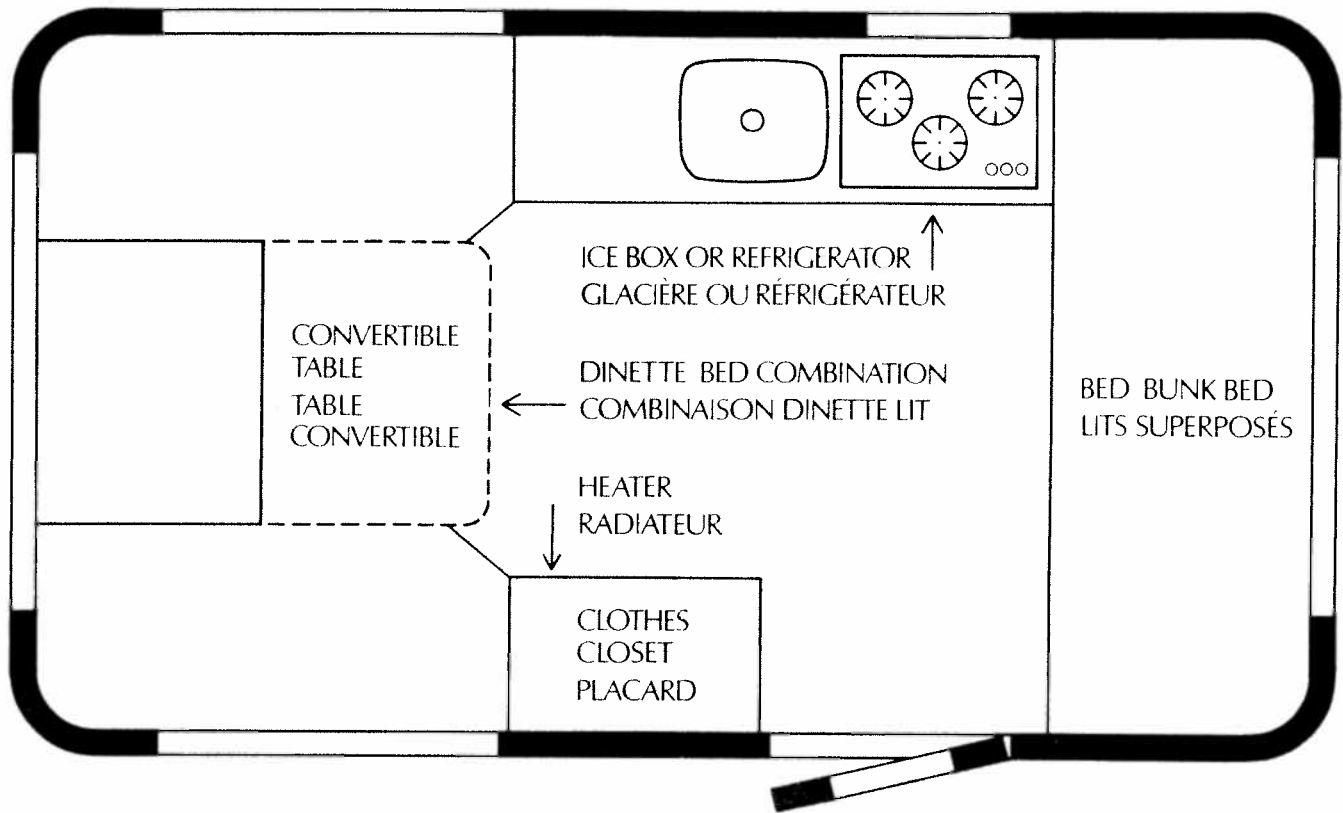

A unique convertible table has been designed that extends to full size for dinner and slides out of the way giving you room to relax afterwards.

More storage has been achieved through super glide drawer units that open with the touch of a finger; a flip-out catch-all, just great for all those odds and ends; and beautiful shelf units enclosed with sliding doors.

Two interiors are offered. You can indulge in our deluxe interior and wiggle your toes in wall to wall shag carpet, or if you prefer, our custom model has easy care ozite carpeting. Both interiors are in warm inviting colours and would be trendsetters anywhere.

The Trillium 4500 is now being introduced across Canada. The demand is high. Place your order now.

Trillium 4500

Chassis—overall length: approximately 15 feet • width: under 80 inches • interior headroom: 6 feet 3 inches • weight: approximately 1375 lbs. • wheel track: 65 inches • clearance height: 7 feet 5 inches
